

# PilotProtector

## The Restraining System for fork lift trucks

---

Tipovers account for 80% of all fatal accidents involving forklift truck drivers. The driver slips off the seat or tries to jump off and thus is fatally injured by parts of the cabin.

Effective protection is guaranteed by keeping the driver inside the cabin as required by the European directive 95/63/EC.

The **PilotProtector** protects the driver in the case of lateral tipovers and complies with all the requirements of the council's directive.

Tilting tests show the risk for the driver

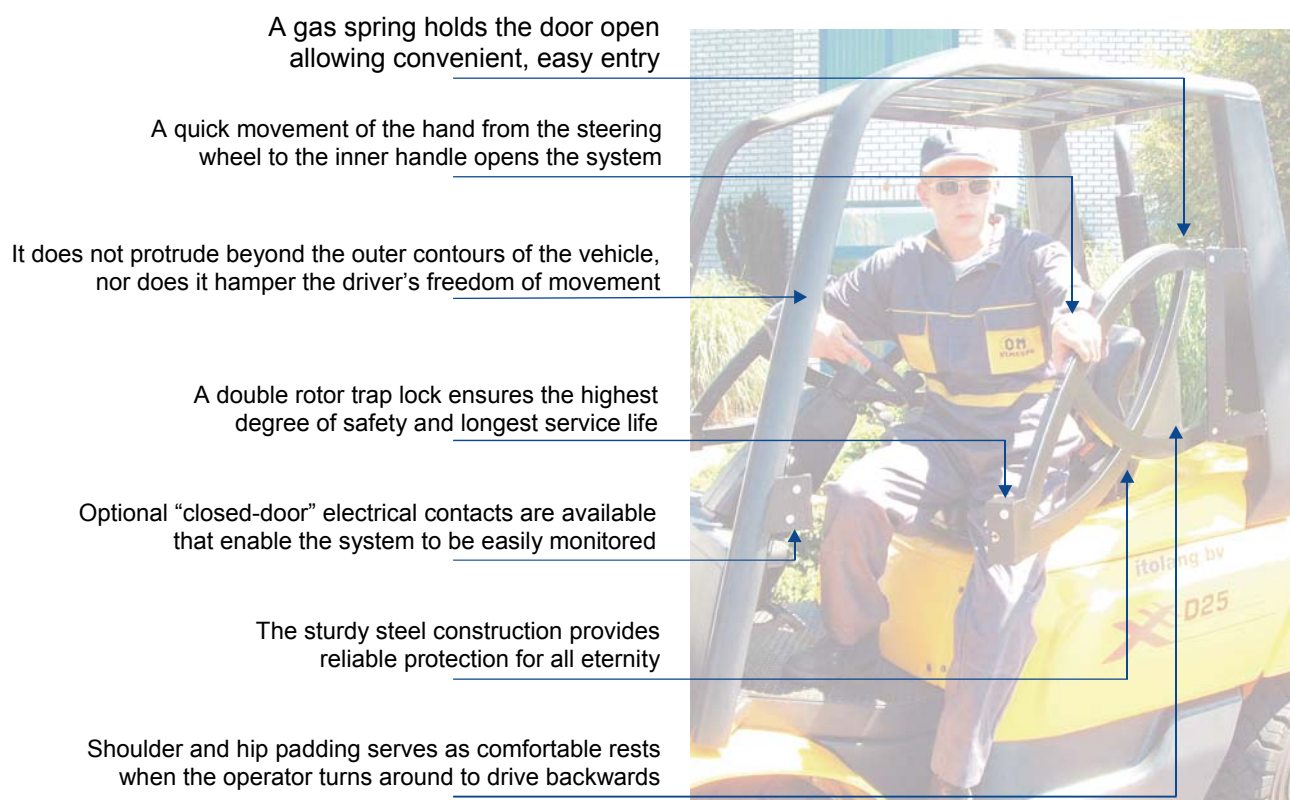

# PilotProtector

## The Restraining System for fork lift trucks

The benefits for facility owners / operators when they install **PilotProtectors** are:

- their forklifts meet the 95/63/EC standard
- their drivers will quickly accept the system
- the system is always active
- it is available for all types of forklifts
- customised solutions are available on request
